I encourage all educators to add a little creativity to their courses with comic strip creation - and ToonDoo is the best tool for that.

Barry Dahl,

ToonDoo has a lot to offer educators and students. The use of the three frame toon means that students really need to identify the three most important points of any idea they are addressing. An excellent tool!

“

ToonDoo hit the spot during my Oceans Motion unit. Students really latched onto using this type of media to present what they had discovered. Two of my students, who are reluctant learners at best, dove into their project presentation with more enthusiasm than I had seen in weeks when offered the ToonDoo.
